

Design Meets Function

BRADLEY PROVIDES COMPLETE PLUMBING AND LOCKER SOLUTIONS FOR EDUCATIONAL FACILITIES

Frequency® Lavatory System was created with input from designers and features a unique continuous wave shape as an attractive way to comply with ADA.

▶▶▶ MAKING THE FACILITIES EASIER TO USE AND MAINTAIN

The goal is to provide plumbing and locker solutions that take up less space so there's more space for learning. With corridor-concept washrooms in mind, the linear Express® lavatory system does the work of multiple individual lavs. Express lavs are available with Indite technology™, a proprietary energy management system that collects and stores restroom lighting, eliminating the need for electricity, as well as costly and time-consuming battery changes. These units require only one set of connections, reducing installation cost and time.

In shower areas, Bradley column showers, wall showers and pivoting wall showers can serve multiple users in less space at a lower cost. Units can be customized with different showerheads and valves, or modesty modules for privacy. Combined with thermostatic mixing valves and TouchTime® metering valves, schools can have the peace-of-mind knowing water temperature and use are under control.

Mention the name "Bradley" in many schools and universities and the feedback you'll get from custodians is about their new "maintenance free" lockers. Lenox® Lockers are made from 30 percent post-industrial recycled content HDPE plastic that will never rust, dent or delaminate—and they won't require any painting. A black option is made of 100 percent recycled material. All lockers, including a new "Z" option, come with a 20-year warranty. ■

DESIGNING ATTRACTIVE, YET DURABLE AND FUNCTIONAL restrooms and locker rooms for schools can be a challenge. For instance, many schools now require that students wash hands before lunch to reduce the spread of germs. Yet, the facilities can make it tough for students and teachers to follow through because there are issues with traffic volume, supervision and even accessibility.

Your clients are looking for innovative design choices in plumbing fixtures and accessories that not only address issues like vandalism, traffic flow, water conservation and ADA compliance, but also offer contemporary styling and durability to help reduce life-cycle costs.

Bradley has been an industry leader for 85 years, and has a history of developing school solutions—from multi-height lavatory systems, juvenile-height washfountains and classroom sinks to solid plastic lockers and commercial showers. Bradley often partners with architects to ensure that products are designed to meet specific needs. For example, the multi-height
